v0.1.234 · November 2, 2026

WHAT YOU ARE PRESENTING

# 12 apps. 1 place.

Office In 1 brings together everything people do at work, at school or at home in a single app. Each app keeps its color and its job, but they share your documents and talk to each other.

## In 1 Letter

Documents

- Opens and keeps your .docx
- Spell check in 5 languages
- 35 letters and 20 CVs ready

## In 1 Class

Spreadsheets

- 440+ spreadsheet functions
- Charts and .xlsx files
- Goal Seek, Solver

## In 1 Stage

Presentations

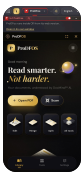

- Themes and animations
- .pptx files
- Adapts to your audience

## In 1 Code+

Websites and apps

- Websites and apps
- Live preview
- Publish in one click

## In 1 ProDFos

PDF reader and tools

## In 1 Assistant

Does your tasks in every Office

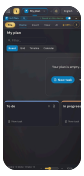

- Say it in plain words
- It makes the linked documents
- With or without AI

## In 1 Notes

Quick notes

- Quick notes
- Phone, tablet, PC
- With or without AI

## In 1 Plan

Calendar and tasks

- Board, grid, timeline
- Calendar and tasks
- 22 ready plans

## In 1 Mail

Email

## In 1 Draw

Diagrams and sketches

- Diagrams and sketches
- Phone, tablet, PC
- PNG, JPG, SVG pictures

## In 1 Form

Forms and surveys

- Forms, surveys, quizzes
- 23 kinds of questions
- Answers and results

## In 1 Image

Photos and pictures

- Photo studio
- Enhance in one tap
- 31 looks, crop, 16 sliders

## What makes it different — the 3 lines to remember

**All in 1**

One app to install, learn and keep up to date, instead of five or six.

**Everything linked**

A Class table placed in a letter updates by itself; the Assistant makes the linked documents from a few words.

**Always current**

Opens your .docx, .xlsx, .pptx; saves on the device; 5 languages; updates itself on every device.

INSTALL

# One code, every device

The QR code leads to a page that recognizes the device and offers the right install. Its address never changes: a printed or posted code stays good forever.

| | |
|---|---|
| **Windows** BEST | **Microsoft Store**: install signed by Microsoft, with no warning. Updates arrive by themselves. `https://apps.microsoft.com/detail/9NW4XQH95MRB` |
| **Android** | Download **OfficeIn1.apk**, open it, then allow “Install unknown apps” for the browser the first time. |
| **iPhone · iPad** | Open the site in Safari → **Share** → **Add to Home Screen**. It then opens like an app. |
| **Mac** | Download **OfficeIn1.dmg** and drag the app into Applications. |
| **Web** | Nothing to install: `https://fisbal.github.io/oi1/` |

fisbal.github.io/oi1/get

**Why one link everywhere?** Instagram and TikTok do not make links clickable in captions. Put the install link in the bio (or a “Link” sticker in Stories); on Facebook and WhatsApp, paste it straight into the text.

POST

# What to post, where, and how

The demo runs 52 seconds at 1080 × 1920, 30 frames/s: it fits all four networks with no editing. Its text and pictures stay in the safe zone (clear of each app's buttons and captions).

| NETWORK | FILE | THE LINK | SAFE ZONE (1080 × 1920) |
|---|---|---|---|
| **Facebook** | MP4 9:16 video as a Reel + a post with the square poster | In the text (clickable) | Reels: keep text out of the top ~100 px and bottom ~300 px |
| **Instagram** | Reel 9:16 (MP4); Story with the vertical poster; square post | Bio, or "Link" sticker in Stories | Reels: ~210 px top, ~310 px bottom, ~84 px right |
| **TikTok** | MP4 9:16 video, add a trending sound in the app | Profile bio (depends on account type) | ~108 px top, ~320 px bottom, ~120 px right |
| **WhatsApp** | Status: the MP4 video (under 90 s); chats and groups: video + text; the PDF to explain in detail | In the message (automatic preview) | Full-screen status: keep to the middle |

## Ready-to-paste texts

**Facebook**

Letters, spreadsheets, presentations, PDFs, notes, calendar… 12 apps in one: Office In 1. 💛

Your .docx, .xlsx and .pptx files open as they are, everything is linked (a table that updates inside your letter), and the app updates itself on Windows, Android, Mac and the Web.

👉 Install: https://fisbal.github.io/oi1/get/
🪟 On Windows: Microsoft Store

#OfficeIn1 #Productivity #Office

**Instagram**

12 apps. 1 place. ✨
Office In 1 brings together In 1 Letter, In 1 Class, In 1 Stage, In 1 Code+, In 1 ProDFos, In 1 Assistant, In 1 Notes, In 1 Plan, In 1 Mail, In 1 Draw, In 1 Form and In 1 Image.

Opens your .docx, .xlsx and .pptx, works offline and updates itself.

**Tiktok**

My whole office in ONE app 🤯 12 apps in 1: letters, spreadsheets, slides, PDF… #OfficeIn1 #productivity #techtok #office

**Whatsapp**

*Office In 1* — your whole office in one app 💛
Letters, spreadsheets, presentations, PDFs, notes and calendar, all linked.
Windows (Microsoft Store), Android, Mac and Web — updates itself.

Install: https://fisbal.github.io/oi1/get/

GETTING IT RIGHT

# What makes a short video work

- **The first 2 seconds decide.** The demo opens on the logo and the promise “Your whole office. One app.”; in the caption, start with a question: “How many apps do you work with?”
- **Many watch with the sound off.** The whole message is written on screen. The video is silent on purpose: add music from the network’s own library (cleared for it), never a song taken elsewhere.
- **One call to action.** “Scan” or “link in bio” — the same install link everywhere.
- **Answer comments within the hour.** Networks show a post that gets reactions to more people.
- **Post as a series.** One video per app (the full demo, then a close-up of Letter, Class, Stage…) keeps the account alive for weeks.
- **Name without copying.** Say “opens your .docx, .xlsx, .pptx files” rather than using other brands’ logos.

**This guide updates itself.** With every Office In 1 update, the video, posters, screenshots, this PDF and the list of apps are made again from the real app (version v0.1.234). Always take the files from the kit page: `https://fisbal.github.io/oi1/promo/` . The QR code itself never changes.
